EDUCATION

PACE UNIVERSITY, Seidenberg School of Computer Science

Masters in Computer Science (GPA 3.52/4.0)

Sep. 2024 – May 2026

New York, USA

UNIVERSITY OF MUMBAI, Terna Engineering College

Bachelor of Engineering in Computer Engineering (GPA-3.4/4.0)

Aug. 2020 – May 2024

Mumbai, India

WORK EXPERIENCE

NBLK® LLC | New York, USA

May 2026 – August 2026(Ongoing)

Conversion Data & Experimentation Fellow

Instrumented end-to-end CTA event tracking and conversion analytics for OKRA™, an AI-powered B2B SaaS platform, standing up multi-method measurement pipelines (Google Tag Manager, Hotjar, GA4) to capture click-through rates, drop-off points, and funnel conversion metrics across real client traffic; produced weekly governance-ready status reports with quantified conversion baselines presented to executive stakeholders.

Evaluate and triage operational ingestion methods across multiple tracking platforms; analyze baseline metrics to resolve data variances and provide clear, data-driven platform recommendations to cross-functional stakeholders.

Design, build, and execute end-to-end A/B testing variants (including UI/video pop-up widgets) to generate rigorous, evidence-based insights and maintaining action logs and open-risk trackers to drive execution against weekly deliverable deadlines.

Quantum Pulse Consulting | Michigan, USA

August 2025 – November 2025

Software Engineer Intern

Orchestrated Jenkins CI/CD Data Pipelines Technology reducing inter-team dependencies by 30% and boosting efficiency by 40%.

Established baseline DORA metrics to track deployment frequency and recovery performance, linking GitHub PR data to monitor change lead times and lead infrastructure and hosting on AWS.

Implemented site reliability monitoring via Playwright synthetic scripts and OpenTelemetry to proactively detect errors and improve SLA observability; managed DB schema migrations (Flyway/Liquibase) and validated RPO/RTO through backup and restore drills.

Project Manager intern (Scrum Master)

Led as PM and the Project Lead for an AI Slack bot application, translating stakeholder requirements into backlog items, overseeing Slack/Coda API integration, validating endpoints via Postman, and resolving IT Asset Management policy conflicts with audit logs ensuring budgeting, calendaring, and 12-month data retention compliance.

Defined and tracked OKRs, facilitated stakeholder syncs to resolve blockers, and implemented a QA feedback loop to inform program planning and staff development.

Contentish Marketing Agency | Mumbai, India

June 2022 – July 2024

Website Developer Intern

Developed bespoke client applications in Python and TypeScript, automating API event handling, UI data synchronization, and CI pipeline orchestration for multiple projects; productionized ML models with automated linting and build validation to ensure high code quality and reliable deployments.

Delivered production-ready applications through rigorous QA, debugging, and data governance practices, guaranteeing data persistence and end-user reliability across stakeholder-specific workflows.

ACADEMIC PROJECTS

Credit Card Fraud Detection Web app(2025) - Built a fraud detection ML pipeline (Python, scikit-learn) using GradientBoosting, Random Forest, and Logistic Regression with SMOTE for class imbalance; engineered features with MLflow/Kubeflow versioning, deployed a Flask inference backend, and published research paper- see: <https://ijirt.org/Article?manuscript=163583> , [Project Demo](#).

Data Analysis Agent (2025) - Built an AI-powered finance analytics assistant using local LLMs (Ollama) for descriptive/predictive insights on CSV/XLSX/JSON data; built analytics core with Pandas/NumPy/Scipy, Plotly/Matplotlib visualizations, and Dockerized deployment with Streamlit, implementing read-only mounts, health checks and Playwright smoke tests [Project Demo](#).

Health-Care Agent (2025) - Engineered a modular multimodal AI model using FastAPI and MCP. • Orchestrated a production-ready multi-container deployment architecture using Docker Compose and Nginx. [Project Demo](#).

Command-Agent (MINI COPILOT) (2025) - Built a terminal-based “mini-Cursor” autonomous agent that plans→acts→observes to execute system commands RAG pipeline with persistent conversation Natural Language Processing context and chat history. Extensible tool-calling Framework with continuous prompting REPL Operations. [Project Demo](#).

TECHNICAL SKILLS

Programming: Python, Artificial Intelligence, LLMsSuite, Machine Learning, Huggingface, LLMOps, VectorDBs, KnowledgeDBs, React, LangChain, SQL, NoSQL, DBMS, Oracle Cloud Infrastructure, C, Microsoft Office Suite, Kubernetes, TensorFlow, Fine Tuning, MLOps, RAG chain

Cloud & DevOps Tools: AWS(EC2, Lambda, S3, DynamoDB, CloudFront), Azure, GCP, Databricks, Docker, Jenkins, Git

Data Science and analysis: Python Algorithms, Power BI, Tableau, Alteryx, Excel, Powerpoint, Business Strategy and Analysis, A/B Testing, Conversion Rate Optimization, Governance & Audit Readiness, Operational Metrics, Risk & Controls

EXPERIENTIAL TRAINING AND BADGES

Smart City Dashboard Hackathon (2025): Transportation risk monitoring ML Engine using MTA and NYC Open data. [Project Demo](#)

AWS AI-ML scholars Challenge (2025) : AWS tools for data analysis, model building, and deploying ML workflows in the cloud.

GOOGLE Professional Project Management Badge (2025): Acquired practical skills in technical project workflows of Google.

Secure CI/CD Pipeline Transformation with Jenkins and Red Hat's Advanced Developer Suite
